# Installation and User Guide

## Required Tools

- Ruler
- Hammer
- Wood block
- Phillips head screwdriver

## Additional Accessories

(dependending on application)

You can view the Kevo installation video online by scanning the code to the right or by visiting www.kwikset.com/kevo/support.

## Parts in the Box

## Prepare door and check dimensions

If drilling a new door, use the supplied template and the complete door drilling instructions available at www.kwikset.com/doorprep.

1. **Measure to confirm that the hole in the door is either 2-1/8" (54 mm) or 1-1/2" (38 mm).**
   - **2-1/8" (54 mm)**
   - **1-1/2" (38 mm)**

2. **Measure to confirm that the backset is either 2-3/8" or 2-3/4" (60 or 70 mm).**

3. **Measure to confirm that the hole in the door edge is 1" (25 mm).**

4. **Measure to confirm that the door is either 1-3/8" or 1-3/4" (35 mm or 44 mm) thick.**

Note: Additional door preparation may be required for doors with 1-1/2" (38 mm) holes. Consult the deadbolt drilling instructions at www.kwikset.com/doorprep.

## Install latch and strike

1. **Is the door edge chiseled?**
   - **YES**
   - **NO**

2. **Hold the latch in front of the door hole, with the latch face flush against the door edge.**
   - **Latch “A”**
   - **Latch “A2”**

3. **Are the latch holes centered in the door hole?**
   - **YES**
   - **NO**

4. **Install strike on the door frame.**
3 Install exterior assembly

A What is the diameter of the hole in the door?

- Diameter is 2-1/8" (54 mm).
- "F" is required for installation. Install "F" on "E".

- Diameter is 1-1/2" (38 mm).
- "F" is not required for installation. Discard "F".

B What is the thickness of your door?

- Door is 1-3/8" (35 mm) thick. Use the shorter, silver screws.
- Door is 1-3/4" (44 mm) thick. Use the longer, gold screws.

C Install exterior assembly and mounting plate.

- Locate mounting plate (K). Note: It may be on the back of the interior assembly (L).
- Cables go underneath latch.
- Route cables through center hole, then push cables into side hole.
- Insert key and test latch. If latch does not extend or retract smoothly, adjust screws (Q/R). Remove key when finished and make sure the latch bolt is fully extended.

4 Install interior assembly

A Remove battery cover and battery pack from interior assembly.

B Connect the thinner cable.

- Make sure turnpiece is in the vertical position.
- Remove interior cover.
- Remove battery pack (Do not install batteries yet).
- Route the thinner cable around the outside of the thicker cable’s square connector.
- Tuck the thinner cable’s connector behind the backplate (as indicated by the sticker on the interior assembly). Tighten screws evenly.
- Lay thicker cable flat against the interior housing.
- Push the turnpiece shaft onto the torque blade. Avoid pinching the excess thinner cable by pulling it away from the torque blade. Note: Turnpiece may not rotate smoothly until after step 5.

D Properly route cables and install interior assembly.

- Ensure tight cable connection.

E CAUTION: Handle cables with care to avoid cable damage. Do not pull or use force.

- Keep parallel to edge of door.

F Door is 1-3/8" (35 mm) thick. Use the shorter, silver screws. Use the longer, gold screws.

- Door is 1-3/4" (44 mm) thick. Use the shorter, silver screws. Use the longer, gold screws.

Q/R (2x)

- Insert key and test latch. If latch does not extend or retract smoothly, adjust screws (Q/R). Remove key when finished and make sure the latch bolt is fully extended.
5 Perform door handing process

This step will teach the lock the orientation of your door and is crucial for lock operation.

A Install 4 AA batteries in the battery pack.
B Make sure the door is open. Insert the battery pack while pressing and holding the Program button. Release the button when the battery pack is all the way inside the lock interior.
C The Status LED will flash red and green, and the lock will beep. Press and release the Program button again. The latch bolt will retract and extend on its own.
D Did the latch bolt retract and extend on its own?

Ensure correct polarity. For best results, use new, non-rechargeable Alkaline batteries only.

A
B
C
D

Door handing process was successful! Proceed to next step after latch bolt stops moving.

If your fob is unable to communicate with the lock, see the online Troubleshooting Guide at www.kwikset.com/kevo/support.

6 Wake up and test Kevo fob

A Press and release the enroll button on the fob with a ballpoint pen to wake it up. When the fob’s LED flashes green, the fob is awake and ready for use.
B Bring your fob and standard key outside with you and close the door. Make sure there is a clear line of sight between the lock and the fob. Touch the deadbolt rose.
C The light ring will spin blue, then flash amber once and you will hear one beep. The door will lock.
D Touch the deadbolt rose again. The light ring will spin blue, then flash green twice and you will hear two beeps. The door will unlock.

Note: The deadbolt rose is the metallic surface behind the light ring.

1. Avoid keeping and storing phones and fobs unnecessarily close to the lock when inside the home. 
2. Never allow an enrolled fob to be used by anyone else without your express permission. 
3. Make sure you have access to your standard key. 
4. When sending an eKey, always double-check that your app settings cannot be altered without your knowledge.

**Important Safeguards**

1. Avoid keeping and storing phones and fobs unnecessarily close to the lock when inside the home. 
2. Never allow an enrolled fob to be used by anyone else without your express permission. 
3. Make sure you have access to your standard key. 
4. When sending an eKey, always double-check that your app settings cannot be altered without your knowledge.
