

NEPTUNE

Create a Neptunian feel with cool hues and soft curves. We didn't forget about Neptune's icy moon, Triton, with this unique lunar clock.

VENUS

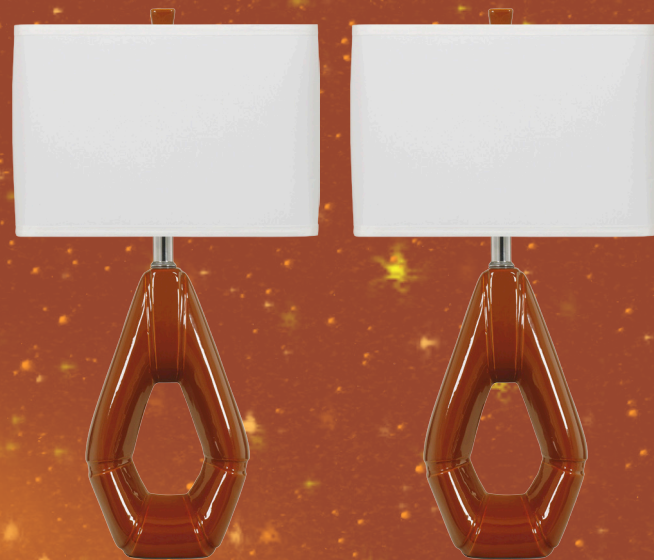

Cozy up with style inspired by Earth's volcano-covered sister planet. An explosion of fiery colors will set a dynamic mood.

MERCURY

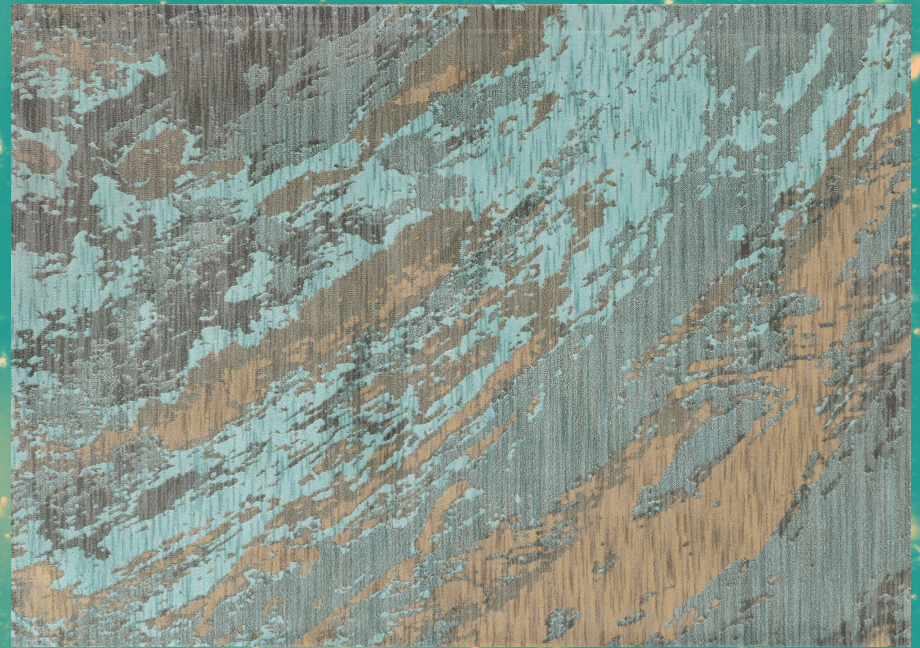

Set a chic look and feel with silvery hues and a mercury glass lamp, inspired by our tiniest planet.

MARS

Reddish colors and desert-like style will set a Martian vibe in your home that's much warmer than the planet itself.

EARTH

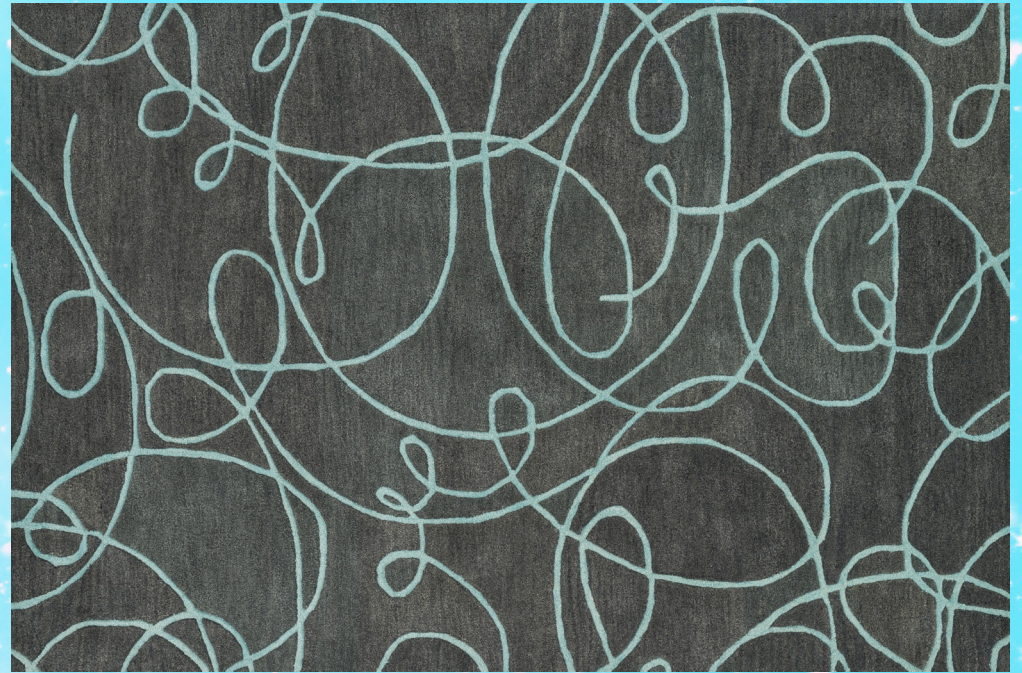

Take inspiration from the most beautiful planet of all. Swirling blues, browns and greens will add earthy appeal to your living space.

SATURN

Embrace shimmery accents and yellow undertones to imitate the "jewel of the solar system."

URANUS

This pale blue planet is reflected in home décor with icy palettes and soft, delicate accents.

JUPITER

Our largest planet challenges you to go big in home design. Use creamy beiges with pops of color to mimic this gas giant.
