

Inclusion of Kwikset® 914 Home Connect with Z-Wave Lock Step-by-Step Guide

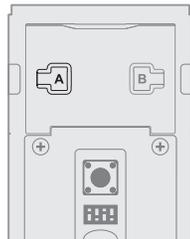

- 1** Prior to installing lock on door, install 4 AA batteries in the battery pack and the place battery pack in the interior of the lock.

- 2** Bring the interior of the lock next to the controller within a 12 inch range. Note: no need to connect the keypad exterior at this time.

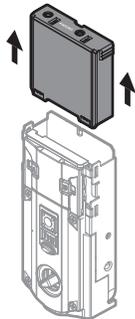

- 3** Follow the controller instructions and include Z-Wave lock in the network. When prompted, press button "A" once to include the lock.

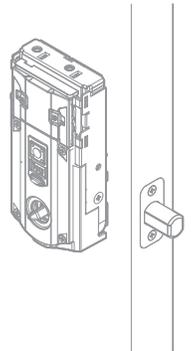

- 4** Verify the lock has been included properly on the display screen.

- 5** Remove the battery pack from the lock and set aside.

- 6** Mount the lock on door. Follow the instructions in the SmartCode 914 Installation and User Guide.

- 7** Conduct the door handing process. See SmartCode 914 Installation Guide.

- 8** Actuate the lock from the controller to verify operation. Lastly, verify that the status of the lock matches the controller status. The Z-Wave lock is now ready to use.
