

Feel at *ease* with OEKO-TEX® certified textiles

The OEKO-TEX® Association

OEKO-TEX® is a global certification system for textiles. Eighteen independent laboratories across the globe comprise the OEKO-TEX® Association. Each year, OEKO-TEX® publishes updated chemical standards to ensure OEKO-TEX® certified textiles adhere to strict scientific criteria that advance global regulations.

Our involvement

Design Collective by Cintas® is adding STANDARD 100 by OEKO-TEX® certification to a number of our textiles. We are actively working with suppliers to increase the number of STANDARD 100 by OEKO-TEX® certified textiles we can offer to our clients.

Caring for our clients

By certifying our textiles with the STANDARD 100 by OEKO-TEX® label, we can assure clients that these textiles follow some of the highest textile chemical standards in the world. Consumers can feel at ease knowing that the STANDARD 100 by OEKO-TEX® certified textile they are wearing has been successfully checked against a list of over 350 harmful substances.
