

Men's shoe size guide

Use the guide to help measure your shoe size to have fitting footwear that helps you get **Ready for the Workday®**

HOW TO MEASURE:

- Wearing socks, stand and place the inside of your right foot to the left edge of the chart
- Place the heel of your right foot to the bottom edge of the chart
- Read chart from standing directly above the foot
- For length, measure from the end of the big toe
 - If the tip of your toe is in a shaded area, order the half size
- For width, measure from the widest part of your foot

MEASURING TIPS:

- Reference the size of the shoe you're currently wearing first
- Use this guide as a reference to double check
- Be sure to try on a sample of the new shoe to ensure a good fit

WOMEN'S SIZING:

When using this chart, women should order the size that they measure on the chart. Keep in mind, this is a men's sizing chart. Therefore, women will order two sizes smaller than their typical size. For instance, if a woman typically wears a 9, she will measure as a 7 on this chart and should order a 7 when purchasing men's footwear.

PRINTING INSTRUCTIONS:

For the most accurate shoe sizing, print this page at 100 percent. Do not scale. To accomplish this, go to the print menu, select page sizing and handling. Print "actual size" or "100% scale."
