Installation Manual

Model:  59268 Premier Bronze  
       59269 Fresh White  
       59270 Matte Silver  
       50278 Brushed Nickel  
Fan weight ±2 lbs: 18.7 lbs (8.5 kg)
The ceiling fan you purchased will provide comfort and performance in your home or office for many years. This instruction manual contains complete instructions for installing and operating your fan. We are proud of our work and appreciate the opportunity to supply you with the best ceiling fan available anywhere in the world.

We are here to help!
This Instruction Manual is designed to make installation as simple as possible. While working through this Instruction Manual, keep your smartphone or tablet nearby. We have added video links to help you through the more technical sections. If you are unfamiliar or uncomfortable with wiring, contact a qualified electrician. We also provide telephone support at 1.888.830.1326 or visit us at HunterFan.com.

Read and Save These Instructions
This product conforms to UL Standard 507.

Warning
w.1 - To reduce the risk of fire, electrical shock, or personal injury, mount fan directly from building structure and/or an outlet box marked acceptable for fan support of 70 lbs (31.8 kg) and use the mounting screws provided with the outlet box.
w.2 - To avoid possible electrical shock, before installing or servicing your fan, disconnect the power by turning off the circuit breakers to the outlet box and associated wall switch location. If you cannot lock the circuit breakers in the off position, securely fasten a prominent warning device, such as a tag, to the service panel.
w.3 – To reduce the risk of electric shock, this fan must be installed with an isolating wall control/switch.
w.4 - To reduce the risk of personal injury, do not bend the blade brackets when installing the blade brackets, balancing the blades, or cleaning the fan. Do not insert foreign objects in between rotating fan blades.

Caution
c.1 - All wiring must be in accordance with national and local electrical codes ANSI/NFPA 70. If you are unfamiliar with wiring, use a qualified electrician.
c.2 - Use only Hunter replacement parts.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and if not installed and used in accordance with the instructions may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
  • Reorient or relocate the receiving antenna.
  • Increase the separation between the equipment and receiver.
  • Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
  • Consult the dealer or an experienced radio/TV technician for help.

Caution: modifications not approved by the party responsible for compliance could void user’s authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Here are the tools you’ll need to complete your installation:

Ladder  Screwdriver  Pliers  Wire Strippers

OPTIONAL
If mounting to a support structure, you will also need these tools.

Drill  9/64” Drill Bit
Do not discard the hardware bags or mix parts from different bags. Make note of the symbol printed on each hardware bag. The symbols can be used to identify the appropriate hardware for each step.

Hunter Pro Tip:
Do not discard the hardware bags or mix parts from different bags. Make note of the symbol printed on each hardware bag. The symbols can be used to identify the appropriate hardware for each step.

Find a part that is missing or damaged? Don’t take it back to the store. Let us make it right. Visit us at HunterFan.com or call us at 1.888.830.1326.
Choosing the Right Installation Location

You probably bought this fan with a location in mind. Let’s check below to make sure it is a good fit.

Check the room dimensions:

- 30 inches from blade tip to nearest wall or obstruction
- 7 feet from bottom edge of blade to the floor

Check the outlet box:

- You must be able to secure the fan to building structure or fan-rated outlet box.

Installing the Ceiling Bracket

You have two options for installation. Pick which one works best for your location. Remove any existing bracket prior to installation. Only use the provided Hunter ceiling bracket that came in your fan’s box.

**Option 1:** Machine Screws

Use machine screws (provided with outlet box) and washers when securing to existing ceiling fan-rated outlet box. Make sure it is securely installed and is acceptable for fan support 31.8 kg (70 lbs) or less.

**Hunter Pro Tip:**

The machine screws are the ones that came with your outlet box.

**Option 2:** Wood Screws

Use wood screws and washers (included) when securing to support structure with approved electrical outlet box. Drill 9/64” pilot holes in support structure to aid in securing ceiling bracket with hardware found in the ★ hardware bag.

Installing the Top Housing

Thread the wires through the top housing. Place the top housing onto the motor housing so that the holes in the top housing lineup with the holes in the motor housing and the adapter.

Rest the trim ring on the top housing.

Place the canopy on the top housing. Ensure all four screw holes line up with the screw holes in both the top housing and the adapter.

---

WARNING
To avoid possible electrical shock, before installing your fan, disconnect the power by turning off the circuit breakers to the outlet box associated with the wall switch location.

Do this first!
Installing the Top Housing

Install the top housing screws. Install the grounding screw in the smaller screw hole. These screws can be found in the hardware bag.

The wires can be cut, but leave at least 8" extending from the top of the canopy.

Hanging the Fan

NOTICE
To prevent damage to fan, ALWAYS lift holding the fan housing.

Raise the fan and align the slots in the canopy with the hooks on the ceiling plate.

Note: To hang the fan, you must tilt the canopy to an almost vertical position so that the canopy slots sit on the ceiling plate hooks.

Place the slots over the ceiling plate hooks to hang the fan.
Wiring the Fan

We know wiring is hard. Let’s make it easier.

Follow these steps to get your fan wired quickly and safely. Follow the route below that best matches your wall switch setup. If you are unfamiliar with wiring or uncomfortable doing it yourself, please contact a qualified electrician.

You are going to need these:

4 Wire Nuts (these are in the ⭐ bag)

Have a single switch?
Follow these steps:

Connect the grounding wires (green, green/yellow stripe, or bare copper) coming from the ceiling and ceiling plate.

WARNING
The ceiling fan must be grounded. If the ground wire for the installation site is not present, immediately STOP installation and consult a qualified electrician.

WARNING
All wiring must be in accordance with national and local electrical codes ANSI/NFPA 70. If you are unfamiliar with wiring or in doubt, consult a qualified electrician.

Hunter Pro Tip:
Here is how to connect the wires:
Push the bare metal ends of the wires together and slide a wire nut over them. Then, twist the wire nut clockwise until tight. Give it a gentle pull to make sure none of the wires are loose.

Connect the white (grounded) wire from the ceiling to the white wire from the fan.

Connect the second ungrounded (light) wire from the ceiling to the blue wire from the fan.

Connect the black wire (ungrounded) from the ceiling to the black and the blue wires from the fan.

Connect the black wire (ungrounded) from the ceiling to the black wire from the fan.

Connect the white (grounded) wire from the ceiling to the white wire from the fan.

Have dual switches?
Follow these steps:

Connect the grounding wires (green, green/yellow stripe, or bare copper) coming from the ceiling and ceiling plate.

WARNING

Hunter Pro Tip:

Have extra wiring?
Turn the wires upward and push them carefully back through the hanger bracket into the outlet box. Make sure that the wires are still attached to the wire nuts.

WARNING

The ceiling fan must be grounded. If the ground wire for the installation site is not present, immediately STOP installation and consult a qualified electrician.

WARNING

All wiring must be in accordance with national and local electrical codes ANSI/NFPA 70. If you are unfamiliar with wiring or in doubt, consult a qualified electrician.

Connect the  grounding wires (green, green/yellow stripe, or bare copper) coming from the ceiling and ceiling plate.

Connect the black wire (ungrounded) from the ceiling to the black wire from the fan.

Hunter Pro Tip:

Have extra wiring?
Turn the wires upward and push them carefully back through the hanger bracket into the outlet box. Make sure that the wires are still attached to the wire nuts.

Connect the white (grounded) wire from the ceiling to the white wire from the fan.

Connect the second ungrounded (light) wire from the ceiling to the blue wire from the fan.
Installing the Canopy

Swing the fan up to align the canopy screw holes with the mounting holes on the ceiling plate.

**Note:** The slots in the canopy must remain engaged while swinging the canopy for alignment.

Hold the canopy up with the screw holes aligned. Partially install two canopy screws, found in the hardware bag, into the holes opposite the ceiling plate hooks.

Using both hands, push the canopy trim ring up to the top of the canopy. The canopy trim ring will snap and lock into place.

**Note:** Should you need to remove the trim ring, press firmly on opposite sides of the trim ring. The tabs will flex out releasing the canopy trim ring.

Installing the Blades

Put the blade washers found in the hardware bag onto the blade screws found in the hardware bag. Then install the blade screws to secure each blade to the fan.

**Repeat x5**
Assembling the Light Kit

Installing the Bulbs and Glass

WARNING

FAN FALL HAZARD
Make sure all screws are tight to secure the light fixture.

GLASS FALL HAZARD
To prevent SERIOUS INJURY or DEATH, make sure that glass is properly secured.

Install the included LED bulbs into the sockets. When necessary, replace with bulbs of same wattage.

Lift the globe and align the notches in the globe with the tabs in the light kit.

Attach the globe by lifting and turning clockwise one third of a full turn of the glass until it stops.

NOTE: Check to ensure proper engagement.

Insert the third screw, found in the hardware bag, in place and firmly tighten all the three screws.

Carefully push all switch housing components into the switch housing, then install the switch housing plate using two short light kit assembly screws, found in the hardware bag.

WARNING

PARTially install two light kit assembly screws, found in the hardware bag, halfway into the motor housing as shown. It does not matter which two screw holes you choose.

Feed the 9-pin plug connector coming from the bottom of the motor housing through the center hole in the light kit assembly. Connect it to the plug connector found in the switch housing area of the light kit assembly. Make sure to line up the colored markings on the connectors.

Align the keyhole slots in the top of the light kit assembly with the partially installed assembly screws. Wrap the keyhole slots around the screws and twist counterclockwise.

Partially install two light kit assembly screws, found in the hardware bag, halfway into the motor housing as shown. It does not matter which two screw holes you choose.

NOTE: Check to ensure proper engagement.

ON

Turn Power

Installing the Bulbs and Glass

WARNING

GLASS FALL HAZARD
To prevent SERIOUS INJURY or DEATH, make sure that glass is properly secured.
Ceiling fans work in two directions: downdraft (counterclockwise rotation) and updraft (clockwise rotation). To change the direction of airflow, turn the fan off and let it come to a complete stop. Unscrew the finial and remove it from the threaded rod. Remove the finial cap and unscrew the globe keeper while supporting the inner glass with your other hand. Carefully remove the inner glass. Move the reverse switch to the opposite position. Reinstall the inner glass assembly.

Updraft (clockwise rotation) creates a more indirect airflow. Updraft airflow is great for moving warm air downward.

Downdraft (counterclockwise rotation) creates a direct breeze and maximum cooling effect.
**Fan Doesn't Work**

- Make sure power switch is on.
- Pull the pull chain to make sure it is on.
- Push the motor reversing switch firmly left or right to ensure that it is engaged.
- Check the circuit breaker to ensure the power is turned on.
- Make sure the blades spin freely.
- Turn off power from the circuit breaker, then loosen the canopy and check all the connections according to the wiring diagram.
- Check the plug connection in the switch housing.

**Excessive Wobbling**

- Make sure the blades are properly installed on the blade iron posts.
- Turn the power off, support the fan carefully, and check that the hanger ball is properly seated.
- Use the provided balancing kit and instructions to balance the fan.

**Noisy Operation**

- Make sure the blades are properly installed.
- Check to see if any of the blades are cracked. If so, replace all of the blades.

---

**Limited Lifetime Warranty**

Hunter Fan Company grants this limited warranty to the original purchaser of this Hunter ceiling fan. This document can be found at www.HunterFan.com. Thank you for choosing Hunter!

**How Can Warranty Service Be Obtained?**

Proof of purchase is required when requesting warranty service. The original purchaser must present a sales receipt or other document that establishes proof of purchase. Hunter, at its sole discretion, may accept a gift receipt. To obtain service, contact Hunter Fan Company online or by phone.

www.HunterFan.com/Support/Contact-Us/
1-888-830-1326

Please do not ship your fan or any fan parts to Hunter. Delivery will be refused.

**What Does This Warranty Cover?**

Motor — Limited Lifetime Warranty

If any part of your Hunter ceiling fan motor fails during your ownership of the fan due to a defect in material or workmanship, as determined solely by Hunter, Hunter will provide you with a replacement part free of charge.* The foregoing limited warranty applies only to the motor itself and does not apply to electronic controls – such as remote control transmitters, remote control receivers, or capacitors – used in conjunction with the motor. Such electronic control items are included in the one-year limited warranty below.

Other — One-Year Limited Warranty

Except as otherwise indicated throughout this warranty, if any part of your Hunter ceiling fan fails at any time within one year of the date of purchase due to a defect in material or workmanship, as determined solely by Hunter, Hunter will provide a replacement part free of charge.*

Light Kits — Warranty May Vary

Light kits are included in the one-year limited warranty. However, you may qualify for additional warranty coverage if your fan includes one of the following:

- **LED Light Kits — Three-Year Limited Warranty**
  If your LED light kit module (not including glass components) or LED bulb fails at any time within three years of the date of purchase due to a defect in material or workmanship, as determined solely by Hunter, Hunter will provide a replacement part free of charge.*

* If no replacement part can be provided for your fan, we will provide a comparable or superior replacement part at the sole discretion of Hunter.

**What Does This Warranty NOT Cover?**

Labor Excluded. This warranty does not cover any costs or fees associated with the labor (including electrician’s fees) required to install, remove, or replace a fan or any fan parts. There is no warranty for light bulbs (except where otherwise noted); remote control batteries; fans purchased or installed outside the United States; fans owned by someone other than the original purchaser; fans for which proof of purchase has not been established; fans purchased from an unauthorized dealer; accidental damage caused by the fan owner or related parties, modifications to the fan, improper or incorrectly performed maintenance or repair, improper voltage supply or power surge, use of improper parts or accessories, failure to provide maintenance to the fan, or acts of God (e.g. flood). ORIGINAL PURCHASER’S SOLE AND EXCLUSIVE REMEDY FOR A CLAIM OF ANY KIND WITH RESPECT TO THIS PRODUCT SHALL BE THE REMEDIES SET FORTH HEREIN. HUNTER FAN COMPANY IS NOT RESPONSIBLE FOR CONSEQUENTIAL OR INCIDENTAL DAMAGES, DUE TO PRODUCT FAILURE, WHETHER ARISING OUT OF BREACH OF WARRANTY, BREACH OF CONTRACT, OR OTHERWISE. Some States do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you.

ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE APPLICABLE TO THIS PRODUCT ARE LIMITED IN DURATION TO THE PERIOD OF COVERAGE OF THE APPLICABLE LIMITED WARRANTIES SET FORTH ABOVE. Some States do not allow limitations on how long an implied warranty lasts, so the above limitation may not apply to you.

**How Does State Law Affect Warranty Coverage?**

This warranty gives you specific legal rights. You may also have other rights which vary from state to state.
