Congratulations on purchasing your new Hunter® ceiling fan!

The ceiling fan you purchased will provide comfort and performance in your home or office for many years. This instruction manual contains complete instructions for installing and operating your fan. We are proud of our work and appreciate the opportunity to supply you with the best ceiling fan available anywhere in the world.

We are here to help!
This Instruction Manual is designed to make installation as simple as possible. While working through this Instruction Manual, keep your smartphone or tablet nearby. We have added video links to help you through the more technical sections. If you are unfamiliar or uncomfortable with wiring, contact a qualified electrician. We also provide telephone support at 1.888.830.1326 or visit us at HunterFan.com.

Here are the tools you’ll need to complete your installation:

![Ladder](image1)
Ladder

![Screwdriver](image2)
Screwdriver

![Pliers](image3)
Pliers

![Wire Strippers](image4)
Wire Strippers

OPTIONAL
If mounting to a support structure, you will also need these tools.

![Drill](image5)
Drill

9/64" Drill Bit
We recommend that you pull everything out of the box and lay it out. We have grouped the drawn components below with the hardware you’ll need for those parts. The screws below are drawn to scale to make it easier to identify what piece of hardware is needed to install each component.

Hunter Pro Tip:
Do not discard the hardware bags or mix parts from different bags. Make note of the symbol printed on each hardware bag. The symbols can be used to identify the appropriate hardware for each step.

**Find a part that is missing or damaged?**
Don’t take it back to the store. Let us make it right. Visit us at HunterFan.com or call us at 1.888.830.1326.
Choosing the Right Installation Location

You probably bought this fan with a location in mind. Let's check below to make sure it is a good fit.

Check the room dimensions:

- 30 inches from blade tip to nearest wall or obstruction
- 7 feet from bottom edge of blade to the floor

Check the outlet box:

You must be able to secure the fan to building structure or fan-rated outlet box.

Checking the Ceiling Angle:

- **Standard Mounting**
  - Support Structure
  - Ceiling Outlet Box (required)

- **Angled Mounting**
  - Support Structure
  - Ceiling Outlet Box (required)

If you have a flat ceiling:

Hang your fan by a standard downrod. Some fans come with a shorter downrod for a Low Profile installation.

If you have an angled or vaulted ceiling:

1. You will need a longer downrod. (sold separately at HunterFan.com)
2. If your ceiling angle is greater than 34°, you will also need an Angled Mounting Kit. (Sold separately at HunterFan.com)

Angled Mounting

A little more information on Angled Mounting:

For optimum performance and appearance, a longer downrod should be used with your Hunter ceiling fan when installing on high or angled ceiling. If your ceiling is angled greater than 34° you will also need an Angled Mounting Kit. Longer downrods and the Angled Mounting Kit are sold separately at HunterFan.com.

Hunter Pro Tip:

**Determining if you need an Angled Mounting Kit:**

Fold on the dotted line. Place against edge against the wall. Slide towards the ceiling. If the guide touches the wall but not the ceiling, you need an angled mounting kit.
Installing the Ceiling Bracket

You have two options for installation. Pick which one works best for your location. Remove any existing bracket prior to installation. Only use the provided Hunter ceiling bracket that came in your fan’s box.

**Do this first!**

**Turn Power OFF**

**Option 1:** Machine Screws
Use machine screws (provided with outlet box) and washers when securing to existing ceiling fan-rated outlet box. Make sure it is securely installed and is acceptable for fan support of 31.8 kg (70 lbs) or less.

**Option 2:** Wood Screws
Use wood screws and washers (included) when securing to support structure with approved electrical outlet box. Drill 9/64” pilot holes in support structure to aid in securing ceiling bracket with hardware found in the ★ hardware bag.

**ANGLED MOUNTING TIP**
For angled ceilings, point opening toward peak.

**Hunter Pro Tip:**
The machine screws are the ones that came with your outlet box.

Installing the Downrod

Follow below if you are using the downrod that came pre-assembled in your box. Need to install a longer or shorter downrod? Check out the guide at the end of this manual.

**Hunter Pro Tip:**
The ground wire attached to the downrod is approximately 8 inches.

**WARNING**

**FAN FALL HAZARD**
To prevent SERIOUS INJURY or DEATH:
- ALWAYS tighten setscrew with pliers.
- DO NOT hand tighten setscrew.
- CHECK the setscrew is tight using pliers each time you change fan direction.

**STEP 1**
Remove the pre-installed setscrew so that the downrod can be inserted.

**STEP 2**
Pass all wires to one side of horizontal bar in downrod assembly. Hand tighten the downrod (at least 4–5 full turns) until it stops. Trim the wires coming from the fan so that 8-inches remain coming from the top of the downrod.

**STEP 3**
Tighten the setscrew with pliers. DO NOT HAND TIGHTEN.
Slide canopy over downrod and wires.

Progress Check:
Your fan should look like this.

NOTICE
To prevent damage to fan, ALWAYS lift holding either the fan housing or the downrod.

Place the downrod ball into the slot in the ceiling bracket.
We know wiring is hard. Let’s make it easier.
Follow these steps to get your fan wired quickly and safely. Follow the route below that best matches your wall switch setup. If you are unfamiliar with wiring or uncomfortable doing it yourself, please contact a qualified electrician.

Hunter Pro Tip:
Have extra wiring?
Turn the wires upward and push them carefully back through the hanger bracket into the outlet box. Make sure that the wires are still attached to the wire nuts.

WARNING
All wiring must be in accordance with national and local electrical codes ANSI/NFPA 70. If you are unfamiliar with wiring or in doubt, consult a qualified electrician.

Follow these steps to get your fan wired quickly and safely. Follow the route below that best matches your wall switch setup. If you are unfamiliar with wiring or uncomfortable doing it yourself, please contact a qualified electrician.

Hunter Pro Tip:
Here is how to connect the wires:
Push the bare metal ends of the wires together and slide a wire nut over them. Then, twist the wire nut clockwise until tight. Give it a gentle pull to make sure none of the wires are loose.

Connect the black (ungrounded) wire from the ceiling to the black wire from the receiver.

Connect the white (grounded) wire from the ceiling to both the white wire from the receiver and the white wire from the fan.

Connect the blue wire from the receiver to the blue wire from the fan.

Connect the yellow wire from the receiver to the black wire from the fan.

Connect the three grounding wires (green, green/yellow stripe, or bare copper) coming from the ceiling, downrod, and hanging bracket.

Slide the remote receiver onto the top of the bracket.
Installing the Canopy

Lift the canopy into place so that the screw holes are aligned.

Hunter Pro Tip:
Let the tool do the work!
A magnetic screwdriver will give you more visibility when securing the canopy.

Installing the Blades:

Attach each blade to a blade iron using the blade washers, found in the hardware bag, and the blade assembly screws, found in the hardware bag.

Repeat x4
Installing the Bulbs and Glass

- Install the included LED bulb into the socket. When necessary, replace with bulb of same wattage.

- Lift the glass and attach it to the light fixture using the three thumbscrews. Tighten all three screws securely by hand.

NOTE: Check to ensure proper engagement.

**WARNING**

GLASS FALL HAZARD
To prevent SERIOUS INJURY or DEATH, make sure that glass is properly secured.

Assembling the Light Kit

- Partially install two light kit assembly screws, found in the hardware bag, halfway into the motor housing as shown. It does not matter which two screw holes you choose.

- Feed the wire plug through the center hole of the upper switch housing, then wrap keyhole slots around the screws and twist counterclockwise.

- Insert the third screw, found in the hardware bag, into place and then tighten all three screws.

- Connect the plugs from the upper and lower switch housings. Make sure to line up the colored markings on the connectors. Lift the lower switch housing until its screw holes are aligned with the screw holes in the upper switch housing.

- Install the three switch housing screws, found in the hardware bag. Tighten all three screws.

- **WARNING**

  FAN FALL HAZARD
  Make sure all screws are tight to secure the light fixture.

  GLASS FALL HAZARD
  To prevent SERIOUS INJURY or DEATH, make sure that glass is properly secured.
Preparing the Wall Control

1 Turning off the power
Ensure the power is OFF at the outlet box and wall switch location before proceeding with installation.

2 Installing the battery
To access the battery compartment, slide the battery door up.
Replace the used battery with two AAA batteries when needed.

3 Wiring the Wall Control
Connect the grounding wire from the wall control to the ground control from the switch box using the provided wire nuts.
Connect the “LIVE IN” from the switch box to the “~VAC” from the wall control using the provided wire nuts.
Connect the “LIVE OUT” from the switch box to the “FAN” out from the wall control using the provided wire nuts.
Push all wires into the switch box.

4 Installing the Wall Control
Install the longer screws through the slots in the wall control into the switch box screw holes.

5 Installing the Wall Plate
Install the shorter screws through the wall control plate and into the screw holes in the wall control.

6 Turning on the power

7 The remote transmitter is already paired to the receiver and ready to use. If you need to pair your remote, cycle power to the fan by turning power off and back on at the wall switch (or circuit breaker if necessary). Within three minutes, do the following:

8 Reference the included remote function card for information on how to use your wall control!
Hunter Fan Company grants this limited warranty to the original purchaser of this Hunter ceiling fan. This document can be found at www.HunterFan.com. Thank you for choosing Hunter!

How Can Warranty Service Be Obtained?
Proof of purchase is required when requesting warranty service. The original purchaser must present a sales receipt or other document that establishes proof of purchase. Hunter, at its sole discretion, may accept a gift receipt. To obtain service, contact Hunter Fan Company online or by phone.

Please do not ship your fan or any fan parts to Hunter. Delivery will be refused.

What Does This Warranty Cover?

Motor — Limited Lifetime Warranty
If any part of your ceiling fan motor fails during your ownership of the fan due to a defect in material or workmanship, as determined solely by Hunter, Hunter will provide you with a replacement fan free of charge.* The foregoing limited warranty applies only to the motor itself and does not apply to electronic controls — such as remote control transmitters, remote control receivers, or capacitors — used in conjunction with the motor. Such electronic control items are included in the one-year limited warranty below.

Other — One-Year Limited Warranty
Except as otherwise indicated throughout this warranty, if any part of your Hunter ceiling fan fails at any time within one year of the date of purchase due to a defect in material or workmanship, as determined solely by Hunter, Hunter will provide a replacement part free of charge.*

Light Kits — Warranty May Vary
Light kits are included in the one-year limited warranty. However, you may qualify for additional warranty coverage if your fan includes one of the following:

- LED Light Kits — Three-Year Limited Warranty
  If your LED light kit module (not including glass components) or LED bulb fails at any time within three years of the date of purchase due to a defect in material or workmanship, as determined solely by Hunter, Hunter will provide a replacement part free of charge.*

Limited Lifetime Warranty

Reversing the Fan

Ceiling fans work in two directions: downdraft (counterclockwise rotation) and updraft (clockwise rotation). To change the direction of air flow, turn the fan off and let it come to a complete stop. The reversing switch is located inside the light fixture. It can only be accessed when the glass is removed. Slide the reversing switch to the opposite position. Restart the fan.

Updraft (clockwise rotation) creates a more indirect airflow. Updraft airflow is great for moving warm air downward.

Downdraft (counterclockwise rotation) creates a direct breeze and maximum cooling effect.

How Can Warranty Service Be Obtained?
Proof of purchase is required when requesting warranty service. The original purchaser must present a sales receipt or other document that establishes proof of purchase. Hunter, at its sole discretion, may accept a gift receipt. To obtain service, contact Hunter Fan Company online or by phone.

Please do not ship your fan or any fan parts to Hunter. Delivery will be refused.

- LED Light Kits — Three-Year Limited Warranty
  If your LED light kit module (not including glass components) or LED bulb fails at any time within three years of the date of purchase due to a defect in material or workmanship, as determined solely by Hunter, Hunter will provide a replacement part free of charge.*

What Does This Warranty NOT Cover?
Labor Excluded. This warranty does not cover any costs or fees associated with the labor (including electrician’s fees) required to install, remove, or replace a fan or any fan parts. There is no warranty for light bulbs (except where otherwise noted); remote control batteries; fans purchased or installed outside the United States; fans owned by someone other than the original purchaser; fans for which proof of purchase has not been established; fans purchased from an unauthorized dealer; ordinary wear and tear; minor cosmetic blemishes; refurbished fans; and fans that are damaged due to any of the following: improper installation, misuse, abuse, improper care, failure to follow Hunter instructions, accidental damage caused by the fan owner or related parties, modifications to the fan, improper or incorrectly performed maintenance or repair, improper voltage supply or power surge, use of improper parts or accessories, failure to provide maintenance to the fan, or acts of God (e.g. flood).

ORIGINAL PURCHASER’S SOLE AND EXCLUSIVE REMEDY FOR A CLAIM OF ANY KIND WITH RESPECT TO THIS PRODUCT SHALL BE THE REMEDIES SET FORTH HEREIN. HUNTER FAN COMPANY IS NOT RESPONSIBLE FOR CONSEQUENTIAL OR INCIDENTAL DAMAGES, DUE TO PRODUCT FAILURE, WHETHER ARISING OUT OF BREACH OF WARRANTY, BREACH OF CONTRACT, OR OTHERWISE. Some States do not allow the exclusion or limitation of how long an implied warranty lasts, so the above limitation or exclusion may not apply to you.

ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE APPLICABLE TO THIS PRODUCT ARE LIMITED IN DURATION TO THE PERIOD OF COVERAGE OF THE APPLICABLE LIMITED WARRANTIES SET FORTH ABOVE. Some States do not allow limitations on how long an implied warranty lasts, so the above limitation or exclusion may not apply to you.

How Does State Law Affect Warranty Coverage?
This warranty gives you specific legal rights. You may also have other rights which vary from state to state.
Troubleshooting

**Fan Doesn’t Work**
- Make sure power switch is on.
- Check the circuit breaker to ensure the power is turned on.
- Make sure the blades spin freely.
- Turn off power from the circuit breaker, then loosen the canopy and check all the connections according to the wiring diagram.

**Noisy Operation**
- Make sure the blades are properly installed.
- Check to see if any of the blades are cracked. If so, replace all of the blades.

**Excessive Wobbling**
- Make sure the blades are properly installed on the blade iron posts.
- Turn the power off, support the fan carefully, and check that the hanger ball is properly seated.
- Use the provided balancing kit and instructions to balance the fan.

**Remote Control of Fan is Erratic**
- Make sure the battery is installed correctly.
- Install a fresh battery.

**Multiple Remote Issues**
- If you have multiple remotes or multiple remote-controlled fans installed on the same circuit breaker and you are experiencing interference or faulty operation of your remote controls, please go to www.HunterFan.com/FAQs and click “How do I properly install multiple remote-controlled fans?” for information on how to correct this issue.

**Hunter Pro Tip:**
Cleaning the Fan
Use soft brushes or cloths to prevent scratching. Cleaning products may damage the finishes.

---

**WARNING**
**FAN FALL HAZARD**
To prevent SERIOUS INJURY or DEATH:
- ALWAYS tighten setscrew with pliers.
- DO NOT hand tighten setscrew.
- CHECK the setscrew is tight using pliers each time you change fan direction.

---

**Downrod**
If you need a different downrod length follow these steps:
Follow steps 1-5 to remove standard downrod pipe

Follow steps 6-10 to reassemble with new downrod
