Improper installation could cause the light fixture to fall, or result in electrical shock or personal injury.

If your fan does not have pin connectors on the wires coming from the switch housing, install the wiring harness provided. Using the provided wire connectors connect the white wire from the fan to the white wire from the wire harness and connect the black or blue wire from the fan to the black wire from the wire harness.

If your fan’s switch housing cap resembles this one, remove the cap screws with a Phillips head screwdriver. Then follow the instructions for TYPE-A ASSEMBLY.

Switch Housing Screw

Wire Connector

Using the single pin connectors, connect the black or blue wire from the fan to the black wire from the light kit. Connect the white wire from the fan to the white wire from the light kit.

Note: Do not allow the light kit to hang only by the wire connectors.

Lift the light kit up to meet the lower switch housing. Guide the two pre-installed light kit screws into the holes in the lower switch housing. Tighten screws.

Switch Housing Screw

Feed the light kit wires through the center hole in the switch housing. Then attach the switch housing to the light kit by installing the light kit screws into the bottom of the switch housing.

Note: Do not allow the light kit to hang only by the wire connectors.

Lift the light kit up to meet the upper switch housing. Install the switch housing assembly screws. Tighten screws.

Using the single pin connectors, connect the black or blue wire from the fan to the black wire from the light kit. Connect the white wire from the fan to the white wire from the light kit.

Note: Do not allow the light kit to hang only by the wire connectors.
If you have problems installing or operating your light kit, do not return this product to the dealer. Call our Consumer Affairs Hotline.

Troubleshooting

Lights don’t come on.
• Make sure that the bulbs are properly installed.
• Make sure power switch is on.
• Pull the pull chain to make sure it is on.
• Check the circuit breaker to ensure the power is turned on.
• Check the pin connections in the light kit.
• Refer to the fan manual for locating the fan’s wiring. Verify that the light and power wires are correctly connected to the ceiling and the light kit.

WARNINGs

w.1 - To reduce the risk of fire, electrical shock, or personal injury, mount fan directly from building structure and/or an outlet box marked acceptable for fan support of 70 lbs. (31.8 kg) and use the mounting screws provided with the outlet box.

w.2 - To avoid possible electrical shock, before installing or servicing your fan, disconnect the power by turning off the circuit breakers to the outlet box and associated wall switch location. If you cannot lock the circuit breakers in the off position, securely fasten a prominent warning device, such as a tag, to the service panel.

CAUTIONs

c.1 - All wiring must be in accordance with national and local electrical codes ANSI/NFPA 70. If you are unfamiliar with wiring, use a qualified electrician.

READ AND SAVE THESE INSTRUCTIONS

This product conforms to UL Standard 507.

Installing the shades - To install the shade, first loosen the thumb screws. Raise the shade to the light fixture. Tighten all thumbscrews securely.

Installing the bulb - Install a bulb into each socket. When necessary, replace bulbs with bulbs of same type and wattage.

Installing the pull chain pendant - Attach the pull chain pendant to the end of the short chains coming from the switch housing and the light kit.

Installing the pull chain pendant coming from the center of the light kit.

To turn lights on and off, pull the pull chain pendant coming from the center of the light kit.
